

**GOT 5 MINUTES?**

**LET'S TALK ABOUT  
DEMOCRACY!**

**WE ASKED THE PEOPLE OF  
CADIZ**

WHAT ARE  
THE FIRST  
WORDS THAT  
COME TO  
YOUR MIND  
WHEN YOU  
THINK ABOUT  
DEMOCRACY?

DO YOU FEEL  
FREE WHEN  
IT COMES TO  
CHOOSING  
YOUR LIFE'S  
PATH?

No.

**Yes. Yes. Yes.**

Not in the current world  
order.

No.

No.

More than other  
but not enough

To some extent

**Not in reality.**

No.

**Definitely**

**Yes**

no.

No.

**Not that  
much**

No, there has been rules  
and laws limiting us

Not really

DO YOU FEEL  
LIKE YOU  
HAVE ANY  
POWER AS A  
CITIZEN?

**No** **More than others but not enough** **Yes.** **No**  
**Definetley not** **Yes minimally and with a lot of effort**  
**NO** **Real power?No** **Yes**  
**Yes but not as much as I should have**  
**Probably not.** **No** **Yes**  
**To some extent**  
**Not really no.** **Yes**  
**No** **Yes**

WHAT  
WOULD YOU  
NEED TO BE  
MORE  
POWERFUL?

A reflection of  
peoples wishes

People more at the  
front. (in terms of  
value)

Empathetic  
leaders, especially  
towards  
immigrants

Change my own mindset  
and become more open

More communication and  
dialogue, to feel a part of  
the process as a citizen.

The governemnt to  
actually do what they  
promise, for corruption  
to be met with  
accountability and  
justice and for equality  
regardless of race,  
religion, gender or  
creed.

My association,  
networking, more  
diverse and inclusive  
surroundings

Anything and  
everything aiming  
for equality,  
equity and justice.

I do not wish to be  
more powerfu, but I  
wish for people  
arouind me to have  
more opportunities to  
make decisions.

The government  
and politicians  
should listen to  
citizens more.

A younger  
government  
reflective of what  
the youth want

WHAT ARE THE  
FIRST 3 WORDS  
THAT COME TO  
YOUR MIND  
WHEN YOU THINK  
ABOUT ARTIFICIAL  
INTELLIGENCE?

Scary Replacement Interest Exciting  
Chat GPT  
Smart Dangerous Elon Musk Innovation  
Opportunity Dystopia Interesting  
World Respect What Misunderstood  
domination Dehumanisation Freedom  
Optimism  
Control Faith Misinterpreted  
Efficiency Horror Change  
Robot Concerning Power

# DO YOU THINK AI WILL HAVE AN IMPACT ON DEMOCRACY?

**Yes** Yes, AI is taking language away from people, one of the strongest weapons of democracy. I might sound like a bigot but AI will take away our individuality when everything will become automated. Reality and virtual world will be barely identified

**Absolutely, but unsure if it will be negative or positive**

It can provide more liberties, but also restrictions.

**Yes, depends on how it is used and by whom.**

Yes, through data analysis, efficiency, and civic participation. However, potential challenges and risks like, algorithm bias, privacy breaches, cybersecurity threats, and even more concentration of power. There would have to be strict internal controls and frameworks and ensure ethical use of AI

Never really thought about the connection, of the influence of AI on politics, it depends I suppose on how governemnts use it, it can be beautiful yet also scary.

**Yes, democracy can be complemented by AI and should be used not to take jobs away but to facilitate better working conditions (i.e 4 day work week).**

**Hopefully.**

**Depends on how it is used but it presents more of a threat.**

**Everything is possible**  
Depends on how it is used but it presents more of a threat.

**Yes**
